

G-110-NIC  
OPERATION #1  
WALL PROFILES

SOIL HORIZON KEY =

- ① Dark reddish-brown soil (5YR 3/5), clayey loam in texture. Contains reduced quantities of mortar, brick and tile fragments, together with contemporary refuse: glass, nails, wood, clothing, plastic.
- ② Slightly lighter dark reddish-brown soil (5YR 3/4), similar in texture to Horizon ①. Noted as having higher concentration of mortar, brick and tile fragments dispersed throughout soil.
- ③ Lens of dark reddish-brown (5YR 2.5/2) loamy soil, also with high concentrations of roof tile and mortar fragments.
- ④ Walkway foundation refill. Consists mainly of broken-up mortar and cement with stone. No artifacts associated with this horizon, except for scattered roof tiles at bottom of horizon.
- ⑤ Dark brown (7.5 YR 3/4) clayey loam soil. Contains scattered pieces of mortar and roof tile, mostly in the bottom half of strata.
- ⑥ Lens of light brown colored soil with high concentrations of mortar and roof tile fragments. Clayey texture, pulverized mortar giving lighter color and clayey texture to lens.
- ⑦ Strong brown (2.5 YR 5/6) compacted clay soil with broken-up bedrock throughout. Contains roof tile fragments.
- ⑧ Dark brown soil with high concentrations of broken-up bedrock and river gravels. No artifacts observed in wall profile.
- ⑨ Same soil matrix as Horizon ⑦, but without stone.
- ⑩ Fine river sand in reddish-brown soil matrix. No artifacts.
- ⑪ Fine grained, compacted (loess?) soil, dark reddish brown (5YR 3/4) in color. Culturally sterile.

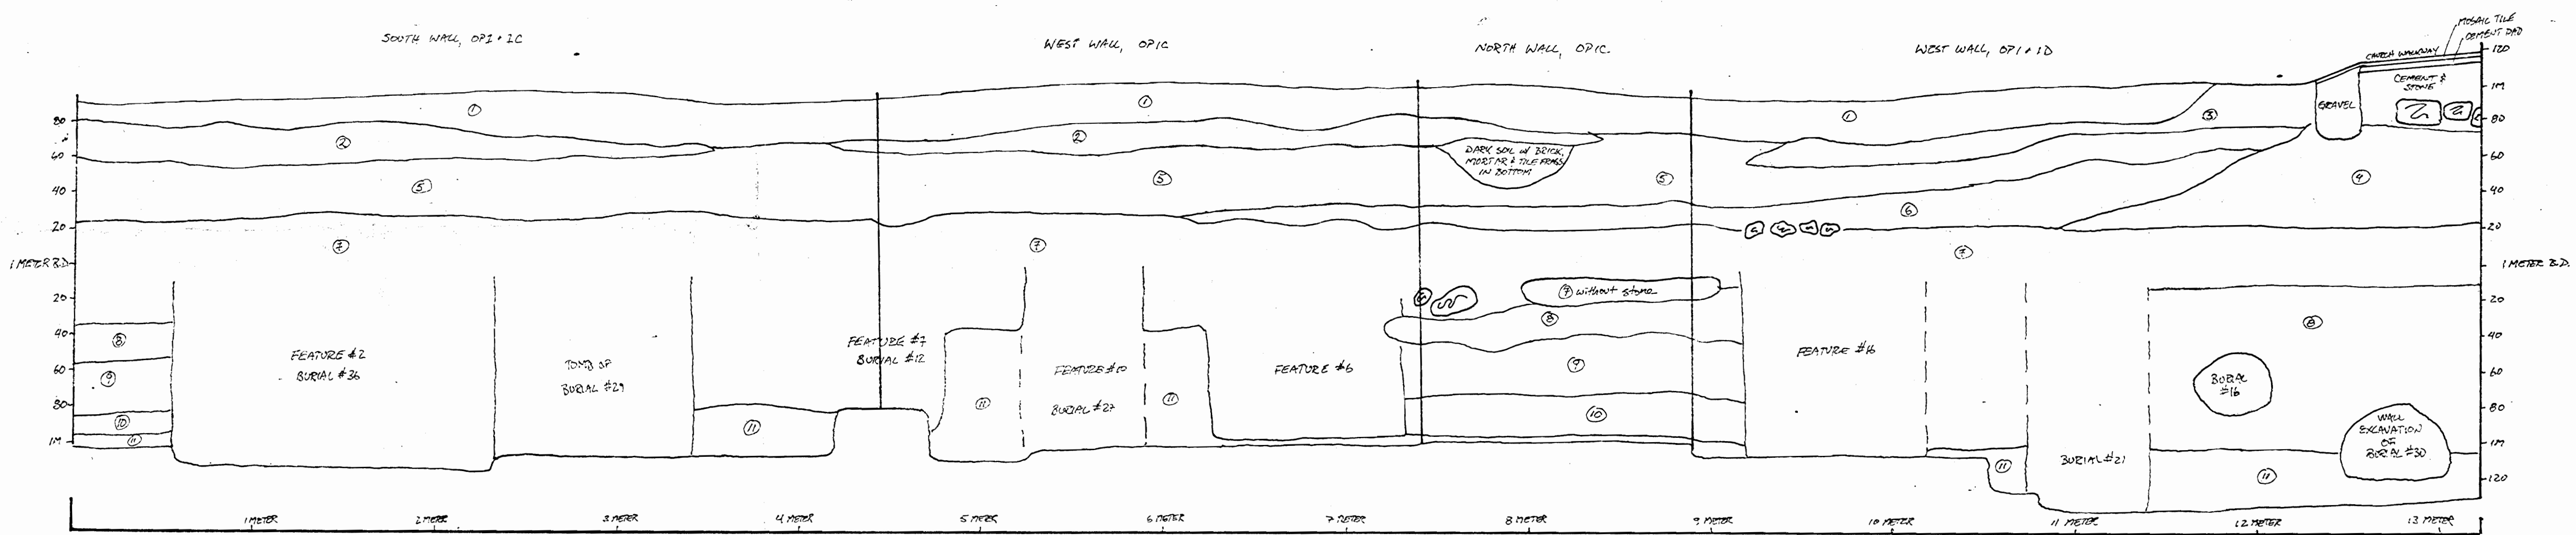

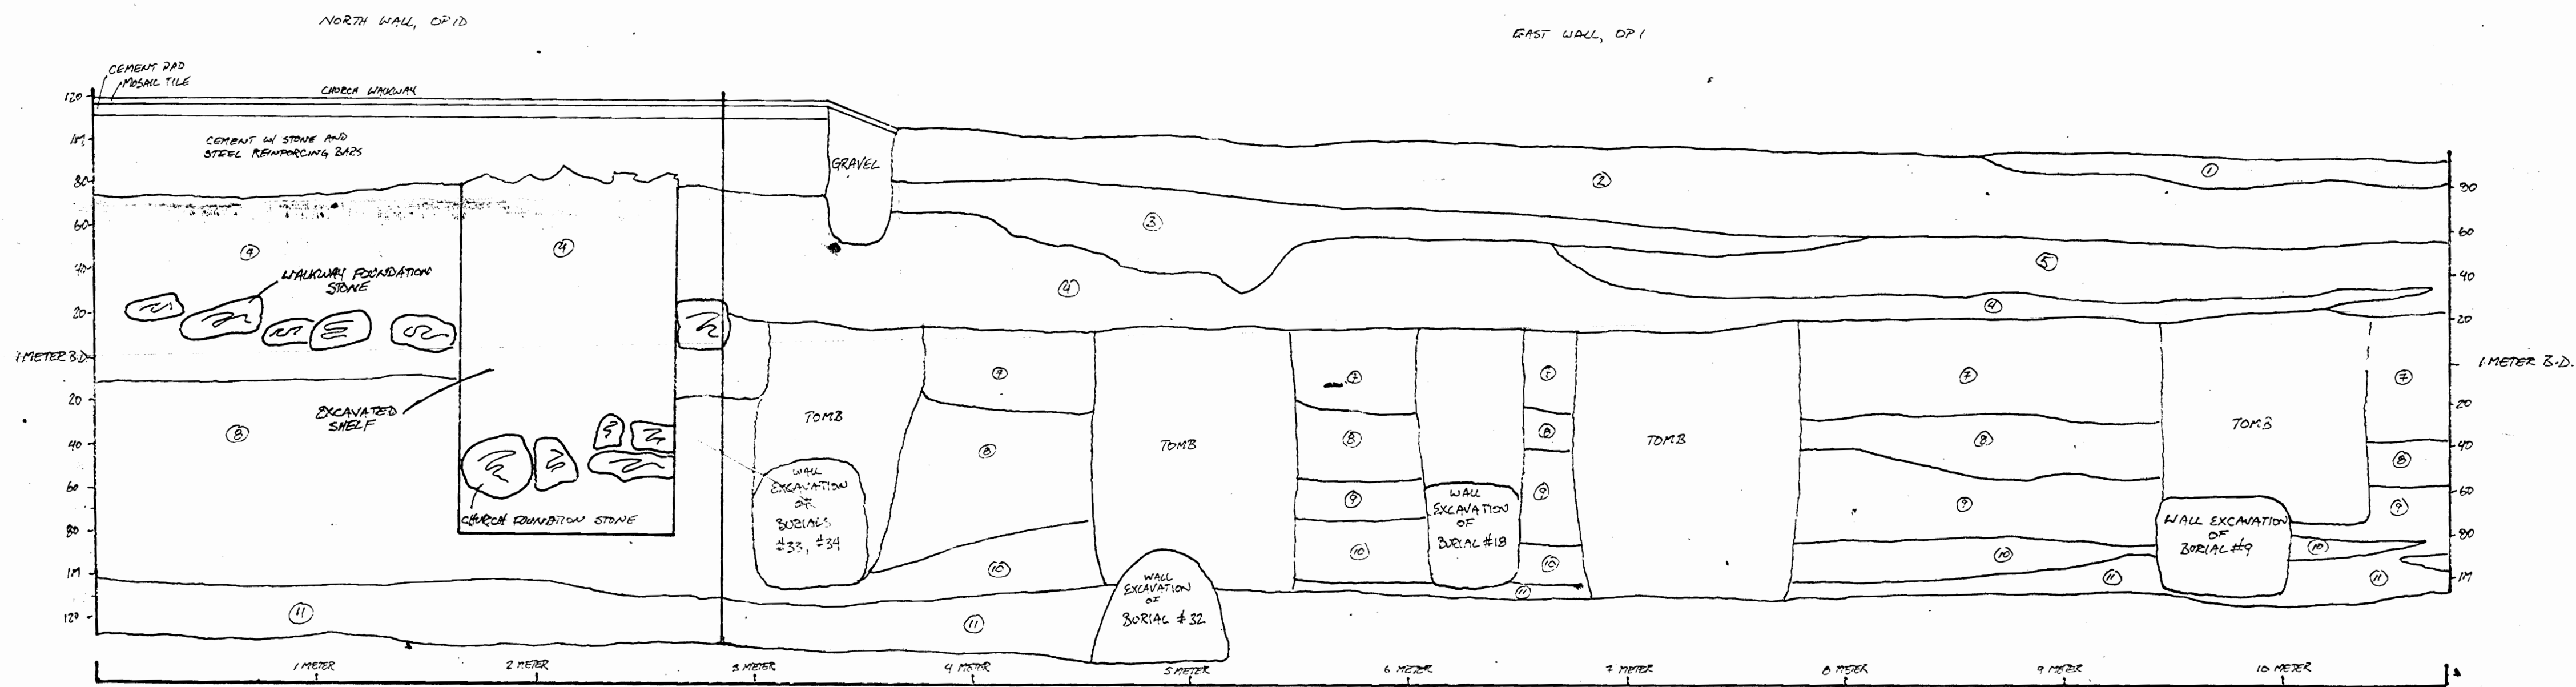

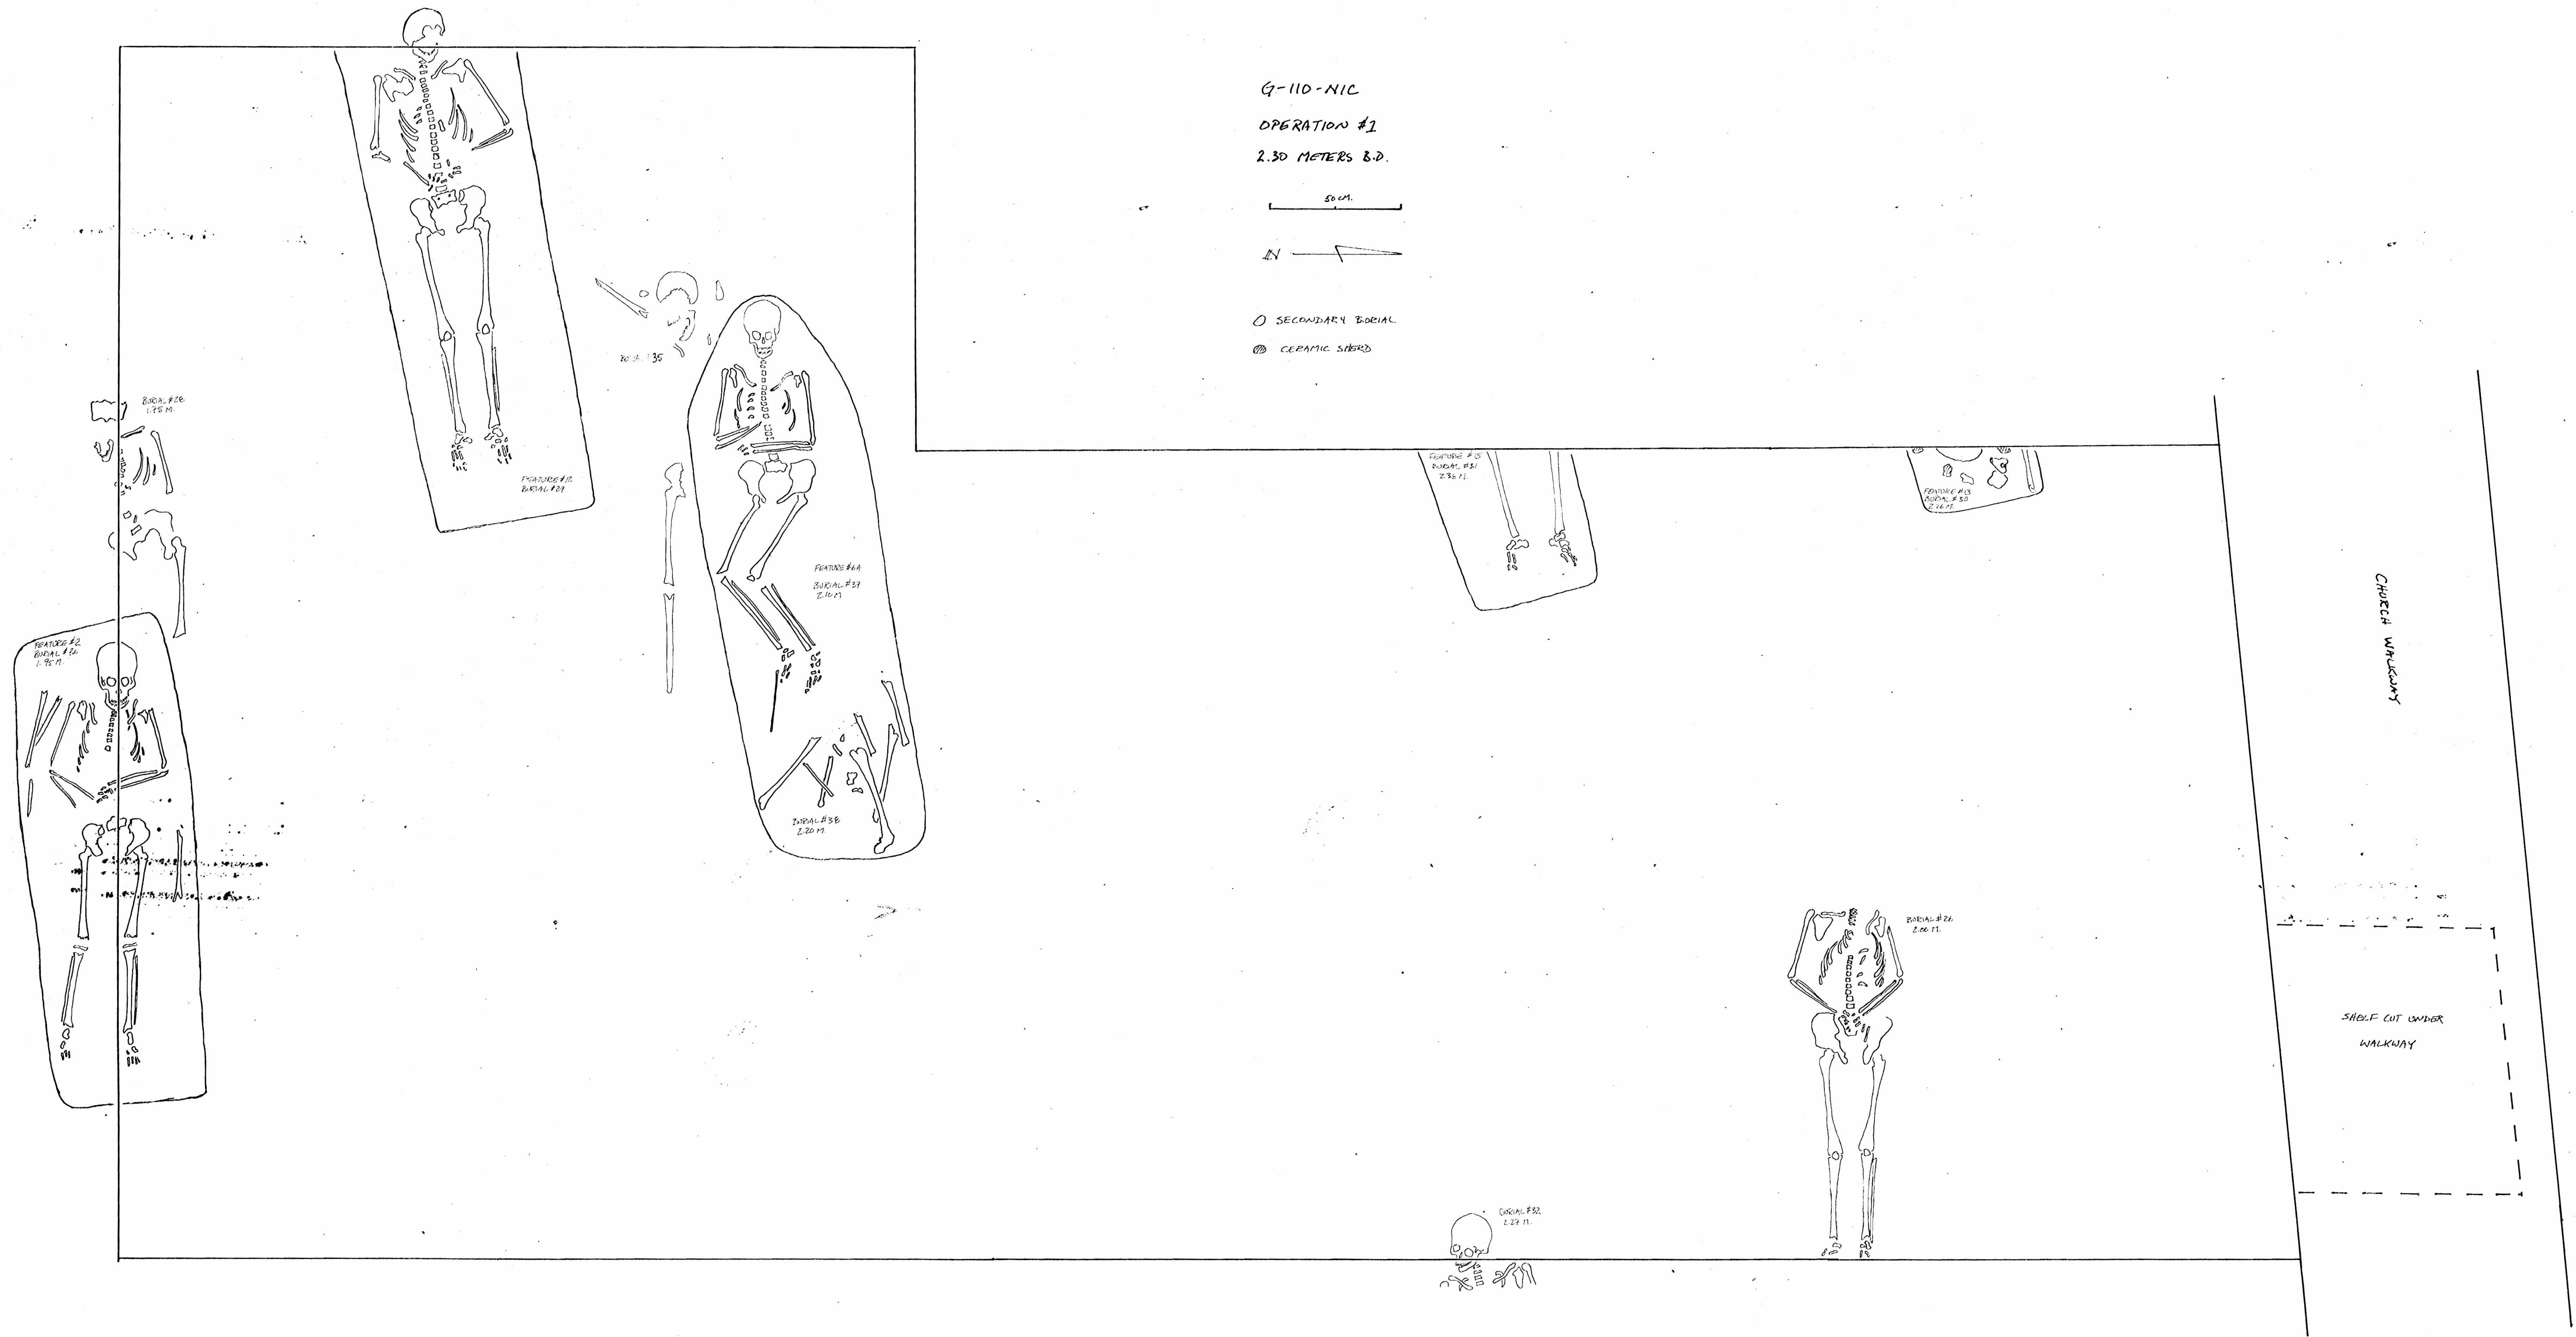

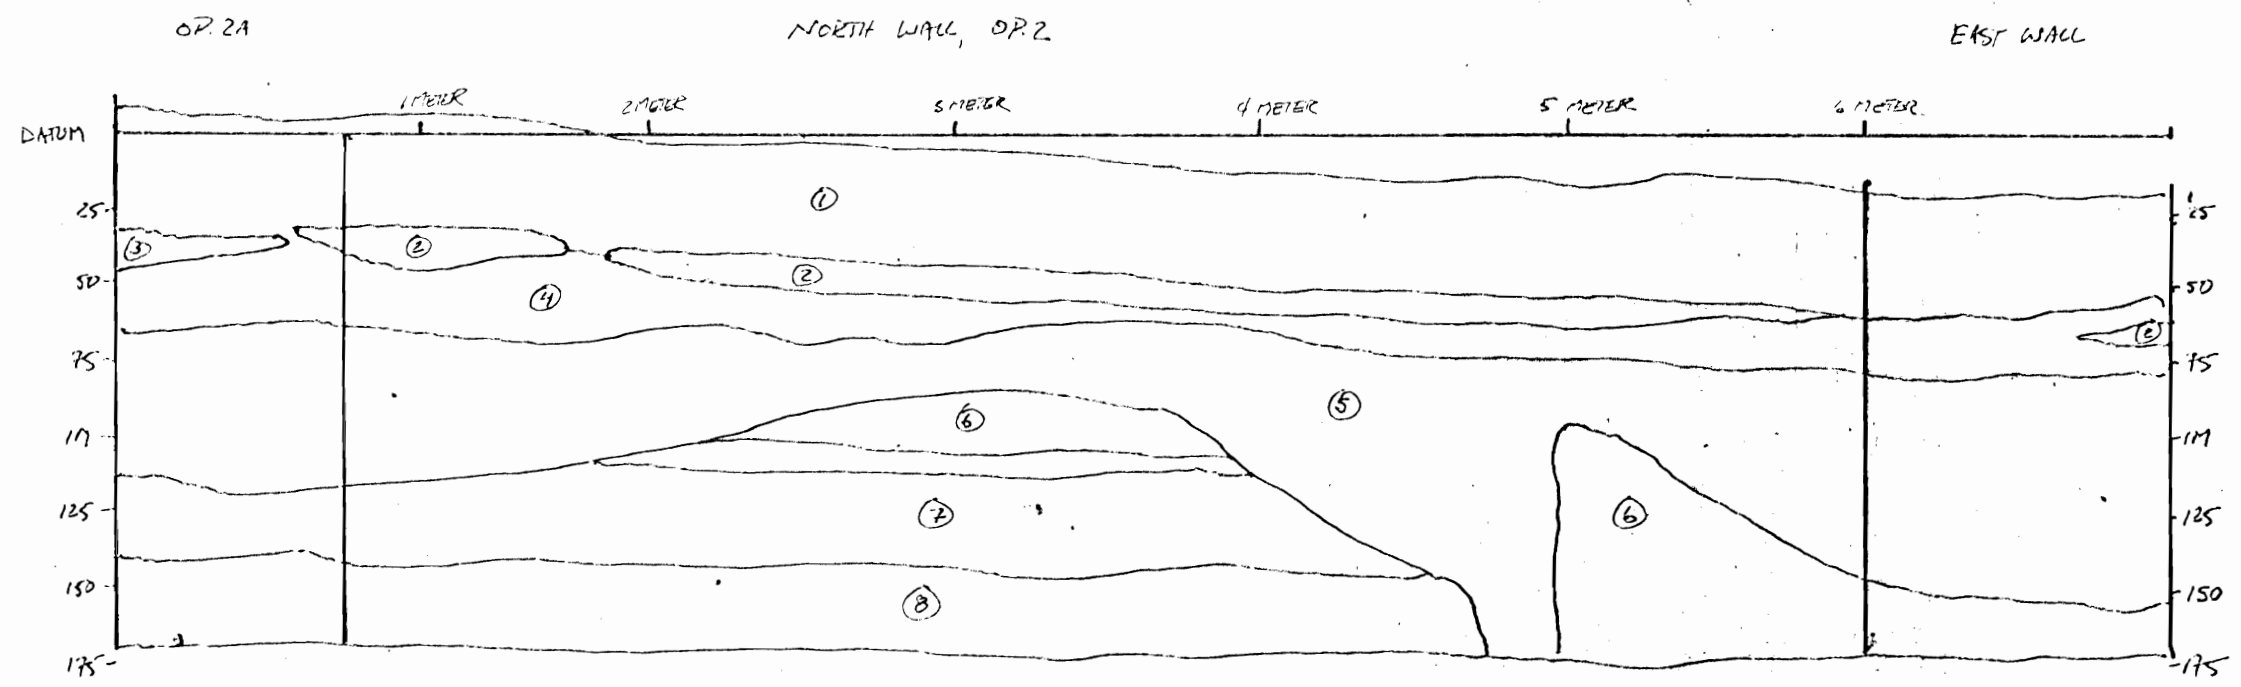

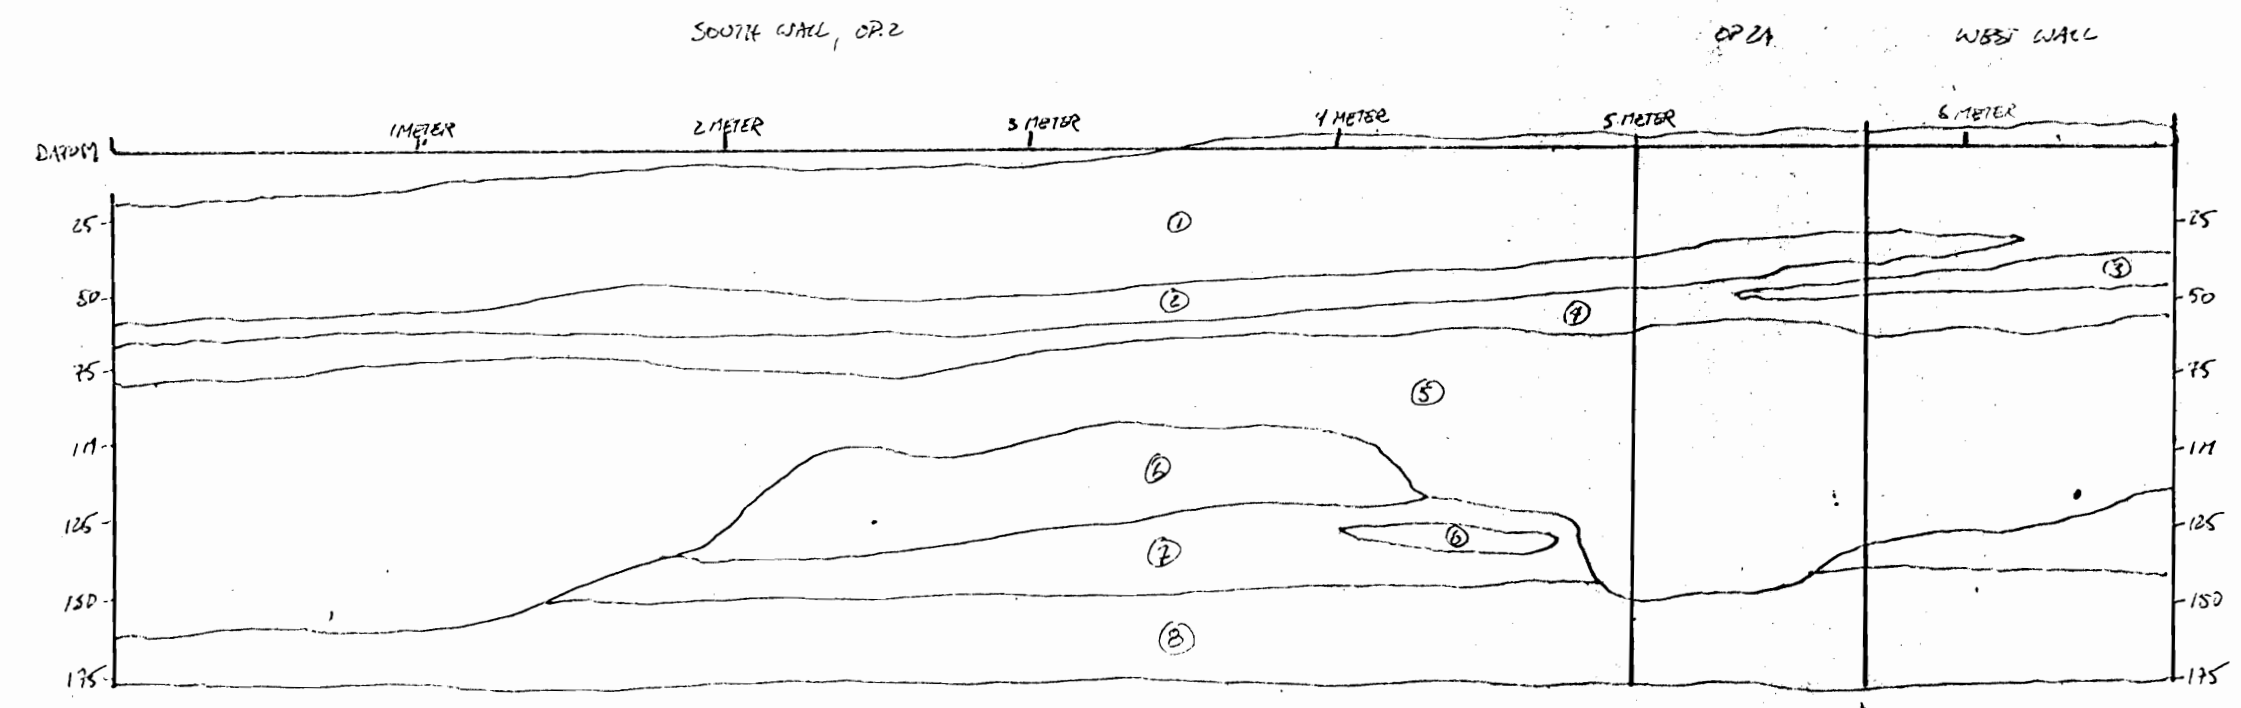

FIGURE #14

FIGURE #7

FIGURE #8

SOIL HORIZON KEY:

- ① Dark reddish-brown (5YR 3/3) clayey loam soil with brick, mortar, and roof tile fragments.
- ② Lens of mottled yellowish-brown fine grained compacted soil without artifacts.
- ③ Lens of dark, charcoal brown (5YR 2/4) soil mixed with ash, evidence of burning activity.
- ④ Continuation of dark reddish-brown (5YR 3/3) clayey soil with artifacts - principally roof tile.
- ⑤ Same soil type as horizon #4, but with high concentration of stone. Also contains artifacts.
- ⑥ Lens of fine grained, lighter colored (5YR 3/4) soil with sand and pebble size stone. No artifacts.
- ⑦ Light brown fine grained compacted (mass?) soil without artifacts.
- ⑧ Dark grey-brown (5YR 0/1) fine grained compacted soil without artifacts.
